THE FOLLOWING APPLIES ONLY IN THE U.S.A.:

### CAUTION:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any unauthorized changes or modifications to this equipment would void the user's authority to operate this device.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

THE FOLLOWING APPLIES ONLY IN THE U.S.A.:

### CAUTION

RISK OF ELECTRIC SHOCK  
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE SCREWS. NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Before use

# PRECAUTIONS

Before using this unit please read these operating instructions carefully. Take special care to follow the warnings indicated on the unit itself as well as the safety suggestions listed below. Afterwards keep them handy for future reference.

## Safety

1. **Power Source**—The unit should be connected to power supply only of the type described in the operating instructions or as marked on the unit.
2. **Polarization**—If the unit is equipped with a polarized AC power plug (a plug having one blade wider than the other), that plug will fit into the AC outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.
3. **Power Cord Protection**—AC power supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them. Never take hold of the plug or cord if your hand is wet, and always grasp the plug body when connecting or disconnecting it.
4. **Nonuse Periods**—When the unit is not used, turn the power off. When left unused for a long period of time, the unit should be unplugged from the household AC outlet.

## Installation

### Environment

1. **Outdoor Antenna Grounding**—If an outside antenna is connected to the receiver, be sure the antenna system is grounded so as to provide some protection against voltage surges and built-up static charges. Section 810 of the National Electrical Code, ANSI/NFPA No. 70-1990, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See figure below.

NEC—NATIONAL ELECTRICAL CODE

2. **Water and Moisture**—Do not use this unit near water—for example, near a bathtub, washbowl, swimming pool, or the like. Damp basements should also be avoided.

3. **Heat**—The unit should be situated away from heat sources such as radiators and the like. It also should not be placed in temperatures less than 5°C (41°F) or greater than 35°C (95°F).
4. **Condensation**—Moisture may form on the lens in the following conditions...

- immediately after a heater has been turned on.
- in a steamy or very humid room.
- when the unit is suddenly moved from a cold environment to a warm one.

If moisture forms inside this unit, it may not operate properly. To correct this problem, turn on the power and wait about one hour for the moisture to evaporate.

### Placement

1. **Ventilation**—The unit should be situated so that its location or position does not interfere with its proper ventilation. Allow 10 cm (4") clearance from the rear of the unit.
2. **Foreign Material**—Care should be taken so that objects do not fall into and liquids are not spilled into the unit. Do not subject this unit to excessive smoke, dust, mechanical vibration, or shock.
3. **Magnetism**—The unit should be situated away from equipment or devices that generate strong magnetic fields.
4. **Stacking**—Do not place heavy objects, other than system components, on top of the unit.
5. **Surface**—Place the unit on a flat, level surface.
6. **Carts and Stands**—The unit should be used only with a cart or stand that is recommended by the manufacturer. The unit and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the unit and cart combination to overturn.
7. **Wall or Ceiling Mounting**—The unit should not be mounted to a wall or ceiling, unless specified in this operating instructions.

## Maintenance

(See page 61 for details.)

Clean the cabinet, panel and controls with a soft cloth lightly moistened with mild detergent solution. Do not use any type of abrasive pad, scouring powder or solvent such as alcohol or benzene.

## Service

1. **Damage Requiring Service**—The unit should be serviced by qualified service personnel when:
  - (a) The AC power supply cord or the plug has been damaged; or
  - (b) Objects have fallen or liquid has been spilled into the unit; or
  - (c) The unit has been exposed to rain; or
  - (d) The unit does not appear to operate normally or exhibits a marked change in performance; or
  - (e) The unit has been dropped, or the enclosure damaged.
2. **Servicing**—The user should not attempt to service the unit beyond that described in the operating instructions. All other servicing should be referred to an authorized service personnel.

**For the address of an authorized servicer:**  
**In the U.S.A., call 1-800-211-7262,**  
**e-mail [consumerproducts@panasonic.com](mailto:consumerproducts@panasonic.com),**

## Listening caution

Selecting fine audio equipment such as the unit you've just purchased is only the start of your musical enjoyment. Now it's time to consider how you can maximize the fun and excitement your equipment offers. This manufacturer and the Electronic Industries Association's Consumer Electronics Group want you to get the most out of your equipment by playing it at a safe level. One that lets the sound come through loud and clear without annoying blaring or distortion—and, most importantly, without affecting your sensitive hearing.

We recommend you to avoid prolonged exposure to excessive noise.

Sound can be deceiving. Over time your hearing "comfort level" adapts to higher volumes of sound. So what sounds "normal" can actually be loud and harmful to your hearing.

Guard against this by setting your equipment at a safe level BEFORE your hearing adapts.

To establish a safe level:

- Start your volume control at a low setting.
- Slowly increase the sound until you can hear it comfortably and clearly, and without distortion.

Once you have established a comfortable sound level:

- Set the dial and leave it there.

Taking a minute to do this now will help to prevent hearing damage or loss in the future. After all, we want you listening for a lifetime.

## Disc symbols used in these operating instructions

The functions you can use depend on the type of disc you play. These marks are used to indicate which type of disc is available for use.

**DVD** : Feature can be used with DVD-Video

**VCD** : Feature can be used with Video CD

**CD** : Feature can be used with Audio CD

Some features cannot be used even if these symbols are indicated.

### Glossary

#### Track

This is the smallest division on Video CD and Audio CD, and usually equates to a single song.

#### Chapter

This is the smallest division on DVD and is roughly equivalent to a track.

#### Title

This is the largest division of DVD.

#### PBC (Playback control)

This method of controlling disc play is included on version 2.0 Video CDs. You are able to interact with the disc through menus.

## Region numbers

Region numbers are allocated to DVD players and software according to where they are sold.

DVDs can be played on this unit if their region number is the same or includes the same number, or if the DVD is marked "ALL".

Confirm the region number for this unit before choosing discs. The number for this unit is indicated on the rear panel.

(For example)

Rear panel

Discs that can be played by the unit shown in this example.

## Types of discs

This unit can playback discs bearing any of the marks:

This unit does not have a DTS decoder so it cannot play audio encoded with DTS.

This unit cannot play the following discs:

- DVD with an unsuitable region number (⇒ page 5)
- DVD-Audio
- DVD-ROM
- DVD-R
- DVD-RAM
- DVD+RW
- DVD-RW
- DIVX Video Disc
- VSD
- CD-ROM
- CDV
- CVD
- CD-G
- CD-RW
- SACD
- SVCD
- CD-R
- Photo CD, etc.

## Type of disc for the type of connected TV

DVDs and Video CDs are recorded using either PAL or NTSC. Refer to this table when selecting discs.

Example of how the picture appears on the screen

TV type	Disc	TV Monitor		
		For Asia	For Australia and New Zealand	For others
Multi-system TV	PAL	✓	✓	×
	NTSC	✓	✓*2	✓
NTSC TV	PAL	×	×	×
	NTSC	✓	×	✓
PAL TV*1	PAL	✓	✓	×
	NTSC	✓*3	✓*4	×

\*1 Only for Asia

Screens shown while the unit is stopped (e.g. initial settings) may not be displayed correctly.

\*2 If you select "2 NTSC" in "9 Other Settings" – "6 NTSC Disc Output", the picture may be clearer (⇒ page 54).

\*3 In "9 Other Settings" – "6 NTSC Disc Output", select "1 PAL 60" (⇒ page 54). If your television is not equipped to handle PAL 525/60 signals the picture will not be shown correctly.

\*4 The factory setting for NTSC disc output is "PAL 60", so no changes to the initial setting are necessary.

### Note

The bottom part of the picture may be cut off if the Video CD played does not comply with standards.

## The remote control

### Batteries

- Insert so the poles (+ and –) match those in the remote control.
- Do not use rechargeable type batteries.

### Do not;

- mix old and new batteries.
  - use different types at the same time.
  - heat or expose to flame.
  - take apart or short circuit.
  - attempt to recharge alkaline or manganese batteries.
  - use batteries if the covering has been peeled off.
  - keep together with metallic objects such as necklaces.
- Mishandling of batteries can cause electrolyte leakage which can damage items the fluid contacts and may cause a fire. If electrolyte leaks from the batteries, consult your dealer. Wash thoroughly with water if electrolyte comes in contact with any part of your body.

Remove if the remote control is not going to be used for a long period of time. Store in a cool, dark place.

Replace if the unit does not respond to the remote control even when held close to the front panel.

### Use

Aim at the sensor, avoiding obstacles, at a maximum range of 7 meters directly in front of the unit.

- Keep the transmission window and the unit's sensor free from dust.
- Operation can be affected by strong light sources, such as direct sunlight, and the glass doors on cabinets.

### Do not;

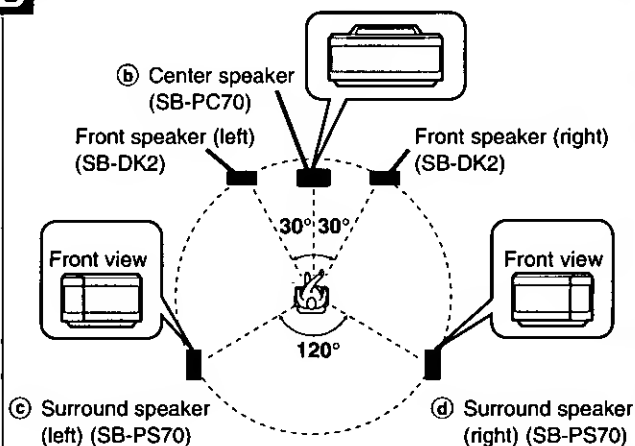

- put heavy objects on the remote control.
- take the remote control apart.
- spill liquids onto the remote control.

# Installation

**A**

**B**

The front, center, and surround speakers should be placed at approximately the same distance from the listening position. The angles in the diagram are approximate.

**C**

## A Placement of front speakers

Place the speakers so that the super woofer is on the outside.

### Note

- Keep your speakers at least 10 mm ( $\frac{13}{32}$ " ) away from the system for proper ventilation.
- To avoid damage to the speakers, do not touch the speaker cones (Ⓐ) if you take the nets off.

## B Placement of center/surround speakers

### Center speaker

Place the center speaker (Ⓑ) directly above the television.

### Note

Do not place the center speaker on this unit as sound quality will be affected.

### Surround speakers

Place the surround speakers (Ⓒ, Ⓓ) either side of the listening position, or slightly to the rear, about 1 meter higher than ear level. Place the speakers with the Panasonic logo facing towards the listening position. However, the position should be adjusted to your personal preference, because the effect varies to some degree depending upon the type of music and the music source.

### Note

If you are unable to position the surround speakers as recommended, you can put them near the front speakers and still achieve a surround-like effect (→ pages 37 and 41 "Virtual rear surround").

### C Attaching to a wall

Set speaker onto screws and slide through bracket to lock into position.

### Note

The wall or pillar on which the speakers are to be attached should be capable of supporting 5 kg (11 lb.).

### Use only the supplied speakers.

The combination of the unit and the included speakers provides the best sound. Using other speakers can damage the unit and sound quality will be adversely affected.

### Caution

- Use the speakers only with the recommended system. Failure to do so may lead to damage to the amplifier and/or the speakers, and may result in the risk of fire. Consult a qualified service person if damage has occurred or if you experience a sudden change in performance.
- Do not attempt to attach these speakers to walls using methods other than those described in this manual.

### If irregular coloring occurs on your television

Turn the television off for about 30 minutes.

The television's demagnetizing function should correct the problem. If it persists, move the speakers further away from the television.

## Before connection

- Do not connect the AC power supply cord until all other connections are complete.
- To prepare the AM loop antenna, speaker cables and FM antenna, twist the vinyl tip and pull off.

## 1 FM antenna.

Fix the other end of the antenna where reception is best.

## 2 AM loop antenna.

Clamp the antenna into the antenna holder, then connect the antenna terminal.

Keep loose antenna cord away from other wires and cords.

## 3 Front (L/R) speaker cables.

Connect the cables to the terminals of the same color.

### Note

- To prevent damage to circuitry, never short-circuit positive (+) and negative (-) speaker wires.
- Be sure to connect only positive (red, blue or gray) wires to positive (+) terminals and negative (black) wires to negative (-) terminals.

## 4 Center speaker cable

## 5 Surround speaker cables

## 6 TV (not included)

Connect the video connection cord from this unit to your TV. Alternatively, connect through the [S-VIDEO] terminal if the TV has an S-VIDEO terminal (→ page 52).

## 7 (Except for U.S.A., Australia and New Zealand) Set the voltage.

Use a flat-head screwdriver to turn the voltage selector. Set it to the position for your area.

If the power supply in your area is 115 V or 120 V, please set the voltage selector as follows

For 115 V: Set to 110 V.

For 120 V: Set to 127 V.

## 8 AC power supply cord.

The shape of the connector depends on the area.

(Except for U.S.A., Australia, New Zealand and Asia)

- ⚠ If the power plug will not fit your socket, use the power plug adaptor (included).

### Note

The included AC power supply cord is for use with this unit only. Do not use it with other equipment.

### For your reference

Information you enter into the unit's memory, except for time, remains intact for up to a week after the AC power supply cord is disconnected.

## Optional antenna connections

Use outdoor antennas if radio reception is poor.

## FM outdoor antenna

### Note

- Disconnect the FM indoor antenna.
- The antenna should be installed by a competent technician.

## AM outdoor antenna

Run a piece of vinyl wire horizontally across a window or other convenient location.

### Note

- Leave the loop antenna connected.
- Disconnect the antenna when the unit is not in use. Do not use the antenna during an electrical storm.

## Setting the time

**For U.S.A.:** 12-hour clock

**For others:** 24-hour clock

The example shows how to set the 12-hour clock for 4:25 p.m. (16:25).

**1** Press [POWER] to turn the unit on.

**2** Press [CLOCK/TIMER] to display "CLOCK".

Each time you press the button:  
CLOCK → PLAY → REC → Original display

**3** (Within 5 seconds or so)  
Press [V TUNE/TIME ADJ] or [TUNE/TIME ADJ ^] to set the time.

The time display can be changed in one minute units by tapping the buttons, and quickly by holding down the buttons.

**4** Press [CLOCK/TIMER].  
The time is set and the original display is restored.

### Displaying the clock

**When the unit is off**

When ECO mode is off;

The clock is displayed constantly.

When ECO mode is on;

Press [-DISPLAY/-DEMO].

The clock is displayed for about 5 seconds and then the display goes blank again.

**When the unit is on**

Press [CLOCK/TIMER] to display "CLOCK".

Press [FM MODE/BP] again to cancel the mode.

Leave "MONO" off for normal listening.

Stereo and monaural broadcasts are automatically played as they are received.

## Allocation settings

Each country allocates broadcast bands according to their particular system.

**For U.S.A.** (FM: 0.2 MHz ↔ 0.1 MHz):

This unit can receive FM broadcasts allocated in 0.1 MHz steps.

**For others except Australia and New Zealand** (AM: 9 kHz ↔ 10 kHz):

This unit can receive AM broadcasts allocated in 10 kHz steps.

### To change the step

① Press and hold [TUNER, BAND].

After a few seconds the display changes to a flashing display of the current minimum frequency.

② Continue to hold [TUNER, BAND] down.

When the minimum frequency changes, release the button.

To return to the original step, repeat the above steps.

## The radio: preset tuning

There are two methods of presetting stations.

**Automatic presetting:** The stations the tuner can receive are preset.

**Manual presetting:** You can select the stations to preset and the order they are preset in.

Up to 12 stations can each be set in the FM and AM bands.

**A**

### Automatic presetting

Do the following once each for FM and AM.

#### Preparation:

Tune to the frequency where presetting is to begin (→ page 29).

#### Press and hold [MEMORY].

Release the button when the frequency starts changing.

The tuner presets the stations it can receive into the channels in ascending order. When finished, the last station memorized is tuned in.

### Manual presetting

Preset the stations one at a time.

- ① Press [TUNER, BAND] to select "FM" or "AM".
- ② Press [MEMORY] then press [VTUNE/TIME ADJ] or [TUNE/TIME ADJ^] to tune to the required station.
- ③ Press [MEMORY] then press [VTUNE/TIME ADJ] or [TUNE/TIME ADJ^] to select a preset channel.
- ④ Press [MEMORY].

The station occupying a channel is erased if another station is preset in that channel.

### Selecting channels

#### Remote control:

- 1** Press [TUNER] to select "FM" or "AM".

The unit comes on automatically.

Each time you press the button:

FM ↔ AM

- 2** Press [◀/M/V] or [▶/^] to select the channel.

You can select the channel with the numbered button(s).

To select channel 10 or over  
Press [≥10] then the two digits.

- 3** Adjust the volume.

#### Main unit:

- ① Press [TUNER, BAND] to select "FM" or "AM".
- ② Press [TUNE MODE] to select "PRESET".  
Each time you press the button:  
MANUAL ↔ PRESET
- ③ Press [VTUNE/TIME ADJ] or [TUNE/TIME ADJ^] to select the channel.
- ④ Adjust the volume.

## Cassette tapes

You can use either deck 1 or deck 2 for tape playback.

**1 Press [TAPE, DECK 1/2] to select tape as the source.**  
The unit comes on automatically.

**2 Press [▲ DECK 1 OPEN] or [▲ DECK 2 OPEN] and insert the cassette.**  
Insert the cassette with exposed tape facing down and close the holder by hand.

**3 Press [REV MODE] to select the reverse mode.**  
Every time you press the button:

- ⏮ : One side is played.
- ⏮⏮ : Both sides are played.
- ⏮⏮⏮ : Both sides are played 8 times each.

**4 Press [◀/II] (reverse side) or [▶] (forward side) to start play.**

**5 Adjust the volume.**

**To stop the tape**  
Press [■].

**A To change the deck to be used**  
Press [TAPE, DECK 1/2] to select the deck you want to play.

**To listen to 2 tapes consecutively**  
Insert a tape into each deck and select "⏮⏮" in step 3. Both tapes will be played 8 times each.

### Note

Play is interrupted while playing a tape if you open the other deck.

### Cassette tape selection and care

The unit can correctly play the following types. It identifies the type automatically.

Normal position/TYPE I	✓
High position/TYPE II	✓
Metal position/TYPE IV	✓

- Tapes exceeding 100 minutes are thin and can break or get caught in the mechanism.
- Tape slack can get caught up in the mechanism and should be wound up before the tape is played.
- Endless tapes can get caught up in the deck's moving parts if used incorrectly. Use tapes appropriate to this unit's auto-reverse mechanism.

# Enjoying surround sound

The following chart gives a summary of this unit's surround features. It also shows additional effects that can be used to enhance your enjoyment.

## Note

- All the features are only effective if speakers are used. No discernible effect will be heard through headphones.
- None of the features are effective when radio is selected as the source.
- You may experience a reduction in sound quality when these surround systems and effects are used with some sources. If this occurs, either turn the surround system or effect off or reduce the level of the effect.

### A Laser disc player (without 5.1ch output), etc.

This unit has Dolby Pro Logic circuitry. The sound will be reproduced with the same powerful stereophonic effects found in movie theaters.

### B Video cassette recorder

You can playback the sound from a video cassette recorder through this unit's speakers or record sound from this unit onto a video cassette.

### C Record player

Sound cannot be produced unless a phono equalizer (not included) is connected.

A record player with a built-in phono equalizer is recommended.

### D Subwoofer

The included front speakers have super woofers, but by connecting a subwoofer, you can enhance the bass effect found on DVDs encoded with Dolby Digital (→ page 38 for operation).

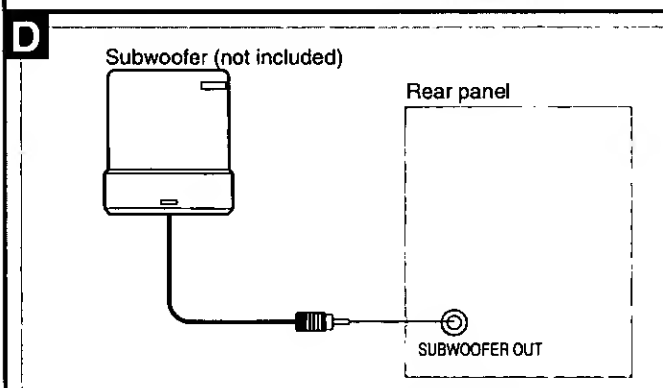

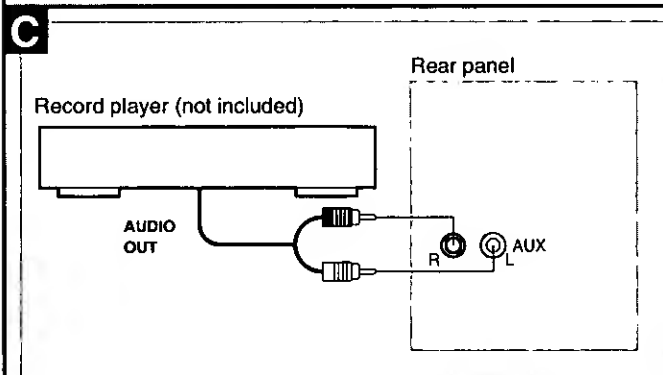

### E TV with an S-VIDEO terminal

The S-VIDEO output terminal achieves a more vivid picture than the video output terminal by separating the color and luminance signals before transmitting them to the television. (Actual results depends on the television.)

### S-VIDEO cable (not included)

See the television's manual for details on connection and operation.

## Using other equipment

### A Listening to an external source

- 1 Press [AUX].**

### Setting details

Select the soundtrack language. Some discs are designed to start in a certain language despite any changes you make here.  
Input a code number with the numbered buttons when you select "5 Other \* \* \* \*" (⇒ page 59).

Select the subtitle language. Some discs are designed to start in a certain language despite any changes you make here.  
Input a code number with the numbered buttons when you select "5 Other \* \* \* \*" (⇒ page 59).

Select the language for the top menu and other menus shown by the disc.  
Input a code number with the numbered buttons when you select "4 Other \* \* \* \*" (⇒ page 59).

Set a ratings level for playing DVDs. The DVDs must have ratings levels recorded on them for this feature to be effective. Discs with this feature will be marked.

Level 8: All DVDs can be played.

Level 7 to level 1: Prohibits play of DVDs with ratings recorded on them.

Level 0: Prohibits play of all DVDs.

The password screen is shown if you choose levels 7 to 0.

Select the language used for menus and messages the unit displays on the television (including these menus).

Choose whether to show the on-screen messages that appear on the television when you perform operations.

Select the color and position of on-screen messages and GUI.

Select the aspect ratio to suit your television.

4:3: Regular television

16:9: Widescreen television

The optimum when listening to 5.1 channel sound is for all the speakers, except for the subwoofer, to be the same distance from the listening position.

You can adjust the delay time for the center and surround speakers to make up for differences in distances between the speakers (⇒ page 59).

These adjustments are effective when playing DVDs encoded with Dolby Digital.

Select a picture type for when the picture is paused.

Field: Less blurred field stills are shown. Select if jittering occurs when "1 Automatic" is selected.

Frame: Sharper frame stills are shown. Select if small text or fine patterns cannot be seen clearly when "1 Automatic" is selected.

Select whether to have sound on or off during the first level of forward search.

Select how software made for a widescreen television is displayed on a regular television (⇒ page 58).

Select whether to have dynamic range compression on or off during play of Dolby Digital software. Dynamic range is the difference between the loudest sound and the softest sound. By compressing this range, you can listen at low volume but still enjoy clear dialog.

Select whether the picture type (I/P/B) is shown when a DVD is paused.

Select whether to output the video signal on NTSC discs as PAL 60 or as the original NTSC signal.

If you have connected a PAL system television, select "1 PAL 60".

If you have connected a multi system television, select "2 NTSC".

Press [RETURN] to restore the original display.

## How different kinds of software appear on your television

DVD software is recorded in a variety of picture formats, and how they appear on your television depends on the software, the kind of television you have, and the picture mode your television is set to.

- Letterbox refers to pictures where black bands appear at the top and bottom.
- Pan & Scan refers to pictures where part of the picture is cut off so it fills the whole screen.

Television and picture mode Software format	4:3	16:9 full mode	16:9 zoom mode	16:9 auto mode
<b>Wide screen, Pan and Scan</b> 	Edges cut off 	Full screen 	Top and bottom cut off 	Full screen 
<b>Wide screen, non-Pan and Scan</b> 	Letterbox 			
<b>Regular (4:3)</b> 	Full screen 	Screen stretched horizontally 	Top and bottom cut off 	Full screen with black bands on the left and right 
<b>Regular (4:3), letterbox</b> 	Letterbox 	Letterbox with screen stretched horizontally 	Full screen 	Letterbox with extremities of picture stretched 

The names given to the television picture modes depend on the maker of your television. There may also be slight differences in how the pictures appear on the screen. Refer to your television's operating instructions for details.

## Calculating delay time

The sound from speakers can reach the listening position at different times depending on placement. You can allow for this difference by changing the delay time of the center and surround speakers.

### Center speaker delay time

If  $D1 \leq D2$ , then set delay time to 0 ms.

If  $D1 > D2$ , then set delay time as follows:

Difference between D1 and D2	Delay time
50 cm	1.3 ms
100 cm	2.6 ms
150 cm	3.9 ms
200 cm	5.3 ms

It is recommended to place all the speakers inside this circle.

### Surround speaker delay time

If  $D1 \leq D3$ , then set delay time to 0 ms.

If  $D1 > D3$ , then set delay time as follows:

Difference between D1 and D3	Delay time
200 cm	5.3 ms
400 cm	10.6 ms
600 cm	15.9 ms

D1: The distance from the front speaker

D2: The distance from the center speaker

D3: The distance from the surround speaker

# Troubleshooting guide

Before requesting service, make the below checks. If you can't fix the unit as described below, or if something not listed here occurs, refer to the enclosed directory to locate an Authorized Service Center convenient to you or contact your dealer.

**For detailed instructions, contact an authorized servicenter in the U.S.A..**

**In the U.S.A., call 1-800-211-7262, e-mail [consumerproducts@panasonic.com](mailto:consumerproducts@panasonic.com), or visit [www.panasonic.com](http://www.panasonic.com)**

Reference pages are shown as black circled numbers ⑧.

## Common Problems

No sound.	Turn the volume up. The speaker cables may be shorted. Turn the unit off, check and correct the connections and turn the unit on. ⑧, ⑨
Sound is unfixed, reversed or comes from one speaker only.	Check the speaker connections. ⑧, ⑨
Humming heard during play.	An AC power supply cord or fluorescent light is near the cables. Keep other appliances and cords away from this unit's cables. If possible in your area, turn the AC power supply cord's plug or connector over to reverse the plug's polarity.
"ERROR" is displayed.	Incorrect operation performed. Read the instructions and try again.
"---:--" appears on the display.	You plugged the power supply cord in for the first time or there was a power failure recently. Set the time. ⑫
"F61" is displayed.	Check and correct the speaker cords connection. If this does not fix the problem, there is a power supply problem. Consult the dealer.
ECO mode on but display still lights up in standby mode.	Turn DEMO off. ⑫
"DTS NO AUDIO" is displayed.	This unit is unable to decode DTS signals.
"DVD U11" is displayed.	The disc is dirty. Wipe it with a soft cloth.
"DVD H □□" is displayed. (□□ will be numbers.)	A problem has occurred. Turn the unit off and unplug the AC power supply cord. Wait a moment and then plug the cord in and turn on the unit again. If the unit is still not working correctly, consult your dealer.

## Listening to the radio

Noise is heard. The stereo indicator flickers or doesn't light. Sound is distorted.	Use an outdoor antenna. ⑨
A beat sound is heard.	Turn the TV off or separate it from the unit.
A low hum is heard during AM broadcasts.	Separate the antenna from other cables and cords.

## When there is a television set nearby

The picture on the TV disappears or stripes appear on the screen.	The location and orientation of the antenna are incorrect. If you are using an indoor antenna, change to an outdoor antenna. The TV antenna wire is too close to the unit. Separate the antenna wire of the TV set from the unit.

## Using the cassette deck

Poor quality sound.	Clean the heads. ⑥①
Recording is not possible.	If the erasure prevention tabs have been removed, cover the holes with adhesive tape. ⑫

## Playing discs

The display is wrong or play won't start.	The disc may be upside down. ⑮ Wipe the disc. Replace the disc if it is scratched, warped, or non-standard. Condensation may have formed inside the unit due to a sudden change in temperature. Wait about an hour for it to clear and try again.
"TAKE OUT/DISC" appears on the display.	There is a problem with the disc mechanism. (A power failure may have occurred.) The tray will open automatically. Remove the disc from the tray, and after ensuring there is no disc in the tray, close it. The unit will make the disc changing noises for a few moments and then it should operate normally.
The picture does not appear on the TV, when playing DVD.	<u>The region number of the disc doesn't match the region number of this unit.</u> ⑤ Connect the video connection cable. ⑧, ⑨ Set the TV to video input mode.
The picture does not appear on the TV, when playing Video CD.	Connect the video connection cable. ⑧, ⑨ Set the TV to video input mode.
CD MANAGER, program and random play cannot be used.	Ensure a Video CD or CD is in the play position tray.
The initial settings menu cannot be accessed.	Select disc as the source. Cancel program and random play, or select "NORMAL" with CD MANAGER. ⑳, ㉑, ㉒
You have forgotten your ratings password.	Reset the unit to its original factory settings by doing the following procedure. ① Press [■] on the main unit and [≥10] on the remote control at the same time for about 3 seconds until the message "Initialized" disappears from the television screen. ② Turn the unit off and on again.

## The remote control

The remote control doesn't work.	Check the batteries are inserted correctly. ⑥ Replace the batteries if they are worn.

## Maintenance

### If the surfaces are dirty

To clean this unit, wipe with a soft, dry cloth.

If the surfaces are extremely dirty, use a soft cloth dipped in a soap-and-water solution or a weak detergent solution.

- Never use alcohol, paint thinner or benzine to clean this unit.
- Before using chemically treated cloth, read the instructions that came with the cloth carefully.

### For a cleaner crisper sound

Clean the heads regularly to assure good quality playback and recording.

Use a cleaning tape (not included).

## Product Service

Do not attempt to remove the cover(s) or repair the unit yourself. Refer servicing to qualified personnel only.
